Rotating Screens

If you have created or have access to more than one wallboard, it is possible to rotate between them either manually or configure your system to do so automatically.

Manual Screen Rotation

To manually rotate between wallboard screens, use either the **Wallboard selector** for selecting a personal or global wallboard or the **Navigation arrows** for flipping from one wallboard to the next.

Automatic Screen Rotation

To enable wallboard screens to automatically rotate, take the following steps:

1. Click the **menu** button
2. Select **Rotation**
3. Select the **Enabled** checkbox
4. Select which wallboards you would like included in the rotation
5. Enter the interval (in seconds) that you would like your screens to rotate at
6. Click **OK**

To disable automatic screen rotation, simply return to the **Rotation** menu option and uncheck the **Enabled** box.
