List of Team Metrics

This section provides detailed descriptions of the real-time metrics that apply to teams and can be displayed via the [Team Metrics View](#) in the Supervision center or via [Campaign Team View](#) in the Campaign Operations center. For definitions of these metrics, as well as a complete list of real-time metrics, see [List of All Real-Time Metrics](#) in the *Reporting Reference Guide*. Metrics here are arranged in alphabetical order.

[Avg ACW Time](#)

List of Skill Metrics

This section provides detailed descriptions of the real-time metrics that apply to individual skills associated with a selected service and that can be displayed via the [Skill Metrics View](#). Metrics are arranged in alphabetical order.

Note the following general considerations regarding skill metrics:

- Unless noted otherwise, the terms *interactions* in the metric descriptions shall be interpreted as *interactions*

that requested (1) the service for which the skill metric view is displayed AND (2) the given skill within this service.

- The term *agents* in the metric definitions shall be interpreted as *agents who have (1) the service skill for which the skill metric view is displayed AND (2) the given skill*. Note that since one service may be associated with more than one team, the agent-related skill metrics (*Logged In* and *Ready*) may include agents that you are not assigned to supervise

Skill Metrics

For definitions of these metrics, as well as a complete list of real-time metrics, see [List of All Real-Time Metrics](#) in the *Reporting Reference Guide*.

[IN Active](#)

[IN Max Wait](#)

[IN Waiting](#)

[Logged In](#)

[Ready](#)

List of Agent Metrics

This section provides a list of the real-time statistics and user properties that apply to agents and can be displayed via the [Agent Metrics View](#). For definitions of all real-time statistics, see [List of All Real-Time Metrics](#) in the *Reporting Reference Guide*. Metrics here are arranged in alphabetical order.

[Active](#)

[ACW Time](#)

Agent Login Time

Agent Login Time shows how much time has elapsed since the moment that the agent logged on to the system.

[Agent State](#)

[Avg ACW Time](#)

[Avg Idle Time](#)

[Avg Preview Time](#)

[BT](#)

[Busy Time](#)

[CAL Overdue](#)

[CAL Reminders](#)

[CSAT](#)

[FCR](#)

Hold

- For calls, *Hold* provides the total time that the agent has had the current call on hold.
- For emails and chats, *Hold* provides the total time that the agent has had the current interaction out of focus.
- If the agent is handling multiple interactions, the displayed *Hold* value relates to the interaction that is currently selected in the agent's Active Communications List.

[Idle Time](#)

[IN Active](#)

[IN Avg Handle Time](#)

[IN Avg Talk Time](#)

[IN Breached SLA](#)

[IN Carried Over](#)

[IN Carried Over New](#)

[IN Closed](#)

[IN Rejected](#)

[IN Replied](#)

[IN Svc Changed](#)

[IN Total Talk Time](#)

[IN Transferred](#)

[IN Transfers](#)

Interaction

Interaction provides the remote party's name, if known, for the interaction that the agent is currently handling.

If the agent is handling multiple interactions, the displayed value relates to the interaction that is currently selected in the agent's Active Communications List. See also the description of metric *Active* above.

[Lists P.A. Completed](#)

[Lists P.A. Remaining](#)

[OUT Desktop](#)

[OUT Handled](#)

[OUT Rejected](#)

[OUT Remote Disconnected](#)

[OUT Transferred](#)

[Preview Duration](#)

[Previewed](#)

[Ready Time](#)

Rec

Rec indicates whether the currently active call is being recorded.

[Sentiment](#)

Service

Service provides the name of the service associated with the interaction that the agent is currently handling.

If the agent is handling multiple interactions, the displayed value relates to the interaction that is currently selected in the agent's Active Communications List.

[Skipped](#)

[Skipped %](#)

[Survey 1](#)

[Survey 2](#)

Talk

- For calls, *Talk* provides the total time that the agent has spent talking on the current call. This metric excludes hold time.
- For emails and chats, *Talk* is the total time that the agent has had the current interaction in focus.

If the agent is handling multiple interactions, the displayed value relates to the interaction that is currently selected in the agent's Active Communications List.

Time in State

Time in State provides the time elapsed since the last agent's state change.

List of Campaign Metrics

This section provides detailed descriptions of the real-time metrics that apply to campaigns and that can be displayed via the [General](#) and [Individual](#) Campaign Metrics views. Metrics are arranged in alphabetical order.

Many metrics available for display in this view can also be displayed via the [Service Metrics View](#). If you cannot find the description of the desired metric in this section, see section [List of Service Metrics](#) or [All Real-Time Metrics](#) in the *Reporting Reference Guide*.

Note the following considerations regarding the general campaign metrics:

- The term *calls* in the metric definition shall be interpreted as *outbound calls associated with the given campaign*.
- The term *agents* in the metric definitions shall be interpreted as *agents qualified to participate in the given campaign* (i.e., those who have the corresponding skill with any level higher than zero). Note that because a campaign may be associated with more than one team, the agent-related service metrics (e.g., *Logged In*, *Ready*, *Occupancy*, etc.) may include agents that you are not assigned to supervise.
- The term *records* shall be interpreted as *records of all lists associated with the given campaign and enabled within this campaign*. Note that if any filters were applied to those lists when they were associated with the given campaign, the filtered-out records will be excluded from any of the following record-related metrics.

Metric Descriptions

For definitions of these metrics, as well as a complete list of real-time metrics, see [List of All Real-Time Metrics](#) in the *Reporting Reference Guide*. The metrics here are listed in alphabetical order.

List of List Metrics

This section provides detailed descriptions of the real-time metrics that apply to individual calling lists within campaigns and that can be displayed via [Lists View](#). For definitions of all real-time metrics, see [List of All Real-Time Metrics](#). Metrics here are arranged in alphabetical order.

Please note: The term *records* in the following descriptions shall be interpreted as *records of the given list within the given campaign*. Note that if any filters were applied to this list when it was associated with the given campaign, the filtered-out records are excluded from any of the following metrics.

Metric Descriptions

Attempted

Attempted is the number of records from a campaign where contact has been attempted, including the records that are currently being attempted. For campaign operations, this metric is only applicable to individual lists.

Attempted %

Attempted % is the percentage of records attempts during a campaign. This metric provides the percentage of attempted records relative to total records for the day. For campaign operations, this metric is only applicable to individual lists.

Completed

The *Completed* metric provides the number of records that have been completed (i.e., the records for which final dispositions have been set).

Completed %

Completed % is the percentage of completed records from a campaign for the day out of the sum of completed and remaining records for the day. For campaign operations, this metric is only applicable to individual lists.

Dialable

Dialable provides the number of records that can be dialed at this moment. Compare this metric to the *Total Remaining* metric that counts all records whose processing within this campaign has not finished. A difference between the two normally indicates that, even though you still have records to process, some of those records have been rescheduled for a future time and, therefore, you may have substantially fewer records that can be actually dialed at the moment. This metric excludes personally assigned records.

Expired

Expired provides the number of records whose processing was finished because the time period during which those records could be called has expired. A record may be set to expire if, for example, the customer agreed to be contacted (opted in) for a limited period of time or to avoid any chance of calling numbers that may have been added to a national or regional/state do-not-call (DNC) list after they were imported into the system for dialing.

Lists P. A. Completed

P. A. Completed returns the number of personally assigned records completed since the beginning of the campaign. This metric is meaningful for preview campaigns only.

Lists P. A. Remaining

P. A. Remaining returns the number of personally assigned records whose processing within this campaign has not finished. This metric is meaningful for preview campaigns only.

State chart

State chart is a bar graph displaying four types of counted records: auto, remaining, scheduled, and completed. Each of these counted records can be filtered in or out of the graph by clicking on the record name type. For campaign operations, this metric is only applicable to individual lists.

Order

Order defines the order (from low to high) in which lists will be used within a given service. For more information, see [List Order](#) in the *Contact Center Administrator Guide*.

Ratio

For lists with the same order, *Ratio* defines the ratio at which records from these lists will be used. For more information, see [Dialing Ratio](#) in the *Contact Center Administrator Guide*.

Total Completed

This metric provides the total number of records, including personally assigned records, completed since the beginning of the campaign.

Total Completed %

This metric provides the percentage of *Total Completed* records relative to *Total Records*.

Total DNC

Total DNC provides the total number of records excluded from dialing since the beginning of the campaign because they matched records in the associated Do Not Call (DNC) lists. This metric includes personally assigned records.

Total Records

This metric provides the total number of records in the list, including personally assigned records.

Total Remaining

Total Remaining provides the total number of records, personally assigned records, whose processing within this campaign has not finished.

List of All Real-Time Metrics

The following is a list of real-time metrics. The metrics are listed in alphabetical order by their full name; shortened names will be shown in parenthesis if available. [Wallboard](#) and [Dashboard](#) names will also be listed where applicable.

For a full list of the vocabulary used in metrics definitions, see [Glossary](#). Additionally, for a list of all metrics by category, see [Real-Time Metrics by Category](#). A grid view of these metrics can also be found in [List of Statistics](#) in the *Real-Time Statistic API* guide.

Agent Idle Time (Idle Time)

Metrics categories: Agent, Campaign

Agent Idle Time is the current idle time for agents, which is the number of seconds an agent has waited since the last interaction; it is calculated as the difference between the current time and time of last agent state change. Note that Idle Time includes Not Ready time.

Agent State

Metrics category: Agent

Agent State displays the current agent state in text form. For the [Not Ready](#) state, this metric includes the reason for not being ready, if available. Note that the same information is shown as an icon preceding agent's name. Agent states and icons are explained in detail in the Bright Pattern Contact Center *Agent Guide*, section [Understanding and Handling Your States](#).

Agents Busy With Interactions of This Service (Busy Svc)

Wallboard name: *Agents busy with this service*

Metrics categories: Campaign, Service

Agents Busy With Interactions of This Service provides the number of agents who are currently handling interactions associated with the given service. This metric includes agents in the [ACW](#) state with respect to such interactions.

Agents in ACW State (ACW Count)

Metrics category: Campaign, Service, Team

Agents in ACW State is the number of agents currently handling [After Call Work \(ACW\)](#). When displayed as a total for several services, this metric shows the total number of distinct agents with the given service skill(s) in this state. Agents with skills corresponding to multiple services in the set are counted once.

Agents Ready (Ready)

Wallboard name: *Matching agents ready*

Metrics categories: Campaign, Skill, Service, Team

Agents Ready is the number of agents in [Ready](#) state. When displayed as a total for several services, this metric shows the total number of distinct agents with the given service skill(s) in this state. Agents with skills corresponding to multiple services in the set are counted once.

Average ACW Time (Avg ACW Time or AACW)

Dashboard name: *AACW*

Metrics category: Agent, Campaign, Service, Team

Average ACW Time is the average daily time agents spend handling [After Call Work \(ACW\)](#). When displayed as a total for several services, this metric shows the average across all services in the set (i.e., it is calculated as the total sum of all durations across all services divided by the total sum of all interactions across all services).

Average Handle Time (IN Avg Handle Time)

Wallboard name: *Average handle time*

Metrics category: Agent, Campaign, Service, Team

Average Handle Time is the average time, including hold time and after-call-work time, that the agent has answered and handled calls to the service. When displayed as a total for several services, this metric shows the average across all services in the set (i.e., it is calculated as the total sum of all durations across all services divided by the total sum of all interactions across all services).

Average Idle Time (Avg Idle Time)

Wallboard name: *Average idle time of matching agents*

Metrics categories: Agent, Campaign, Service, Team

Average Idle Time is the average time that agents have waited between the handling of service interactions. When displayed as a total for several services, this metric shows the average across all services in the set (i.e., it is calculated as the total sum of all durations across all services divided by the total sum of all interactions across all services). Note that Avg Idle Time includes Not Ready time.

Average Preview Time (Avg Preview Time)

Wallboard name: *Average preview time of matching agents*

Metrics categories: Agent, Campaign, Service

Average Preview Time is the average time that agents reviewed records of previewed outbound campaigns, from the moment the preview record was accepted by agents and until it was either dialed or skipped. When displayed as a total for several services, this metric shows the average across all services in the set (i.e., it is calculated as the total sum of all durations across all services divided by the total sum of all interactions across all services).

Average Sentiment (Sentiment)

Metrics categories: Agent, Campaign

Average Sentiment is the average current sentiment of calls. When displayed as a total for several services, this metric shows the average across all services in the set (i.e., it is calculated as the total sum of all durations across all services divided by the total sum of all interactions across all services).

Average Speed of Answer/Reply (IN ASA)

Wallboard name: Average speed of answer/reply

Metrics categories: Service

Average Speed of Answer is the average time that the calls waited in the service queue before being answered. *Average Time to Reply* is the average time between email arrival and the sending of the first meaningful reply (acknowledgment is not considered a meaningful reply). This metric is a cumulative statistic calculated for all interactions since the reset time. When displayed as a total for several services, this metric shows the average across all services in the set (i.e., it is calculated as the total sum of all durations across all services divided by the total sum of all interactions across all services) and is common for both inbound calls and emails.

Note: If ACW is set for an email service, then this metric is changed only after an agent leaves the ACW state.

Average Success Rate - percentage of successful call attempts (ASR %)

Metrics category: Campaign

Average Success Rate is the percentage of successful call attempts out of the last several hundred call attempts made (250 attempts, by default). This metric is used to adjust the calling rate of a predictive campaign to achieve optimal occupancy of available agents without losing answered calls. Thus, the successful call attempt is defined as any call attempt that was answered and queued for delivery to an agent.

Busy Agents (Busy)

Wallboard name: Matching agents busy

Metrics categories: Campaign, Service, Team

Matching Agents Busy is the number of agents in a [Busy](#) state. When displayed as a total for several services, this metric shows the total number of distinct agents with the given service skill(s) in this state. Agents with skills corresponding to multiple services in the set are counted once.

Calendar Reminders (CAL Reminders)

Metrics categories: Agent, Team

Calendar Reminders is the number of entries in the [calendar events](#) queue with time in the future, allowing supervisors to see how many recalls are set up by team, per agent.

Calendar Reminders in the Past (CAL Overdue)

Metrics categories: Agent, Team

Calendar Reminders in the Past is the number of entries in the [calendar events](#) queue with time in the past, allowing supervisors to see how many recalls are overdue per team, per agent.

Call Handling Rate Per Hour (HR)

Dashboard name: HR

Metrics categories: Campaign, Team

Call Handling Rate Per Hour is the average of all calls made per agent per hour.

Callbacks Currently Waiting in Queue (CB Waiting)

Wallboard name: Callbacks in queue now

Metrics categories: Campaign, Service

Callbacks Currently Waiting in Queue is the current number of callback requests currently waiting in the [virtual queue](#) associated with the given service.

Callbacks Requested for the Day (CB Requested)

Wallboard name: Callbacks requested

Metrics categories: Campaign, Service

Callbacks requested is the number of inbound calls to the given service for the day that have chosen the [callback option](#). Note that this metric counts calls; therefore, if one call has requested the callback option multiple times, it will be counted once by this metric.

Campaign Mode (Mode)

Metrics category: Campaign

Campaign Mode displays the current dialer mode for a [campaign](#) ("preview, progressive, predictive").

Completed Records in Active Lists (Lists Completed)

Wallboard name: Completed records in active lists

Metrics categories: Campaign, List, Service

Completed Records in Active Lists is the number of records in active lists that have been marked as completed.

Completed Records with Personal Agent Assignments (Lists P.A. Completed or P.A. Completed)

Wallboard name: Completed records with personal agent assignments

Metrics categories: Agent, Campaign, List, Service

Completed Records with Personal Agent Assignments returns the number of personally assigned records completed since the beginning of the campaign. This metric is meaningful for both preview and progressive campaigns.

Count of Selected Dispositions

Wallboard name: Count of selected dispositions

Metrics categories: Service

Count of Selected Dispositions displays the total number of dispositions that are available for a given call service and then selected per interaction per day.

Custom Survey Metric 1 (Survey 1)

Wallboard name: Custom Survey Metric 1

Metrics categories: Agent, Service, Team

Custom Survey Metric 1 is the average percentage of customer survey responses based on a given metric within the survey. This number is calculated by taking the sum of all values, then dividing them by the total number of interactions, where surveys exist (i.e., the [Save Survey Results](#) block was used).

Custom Survey Metric 2 (Survey 2)

Wallboard name: Custom Survey Metric 2

Metrics categories: Agent, Service, Team

Custom Survey Metric 2 is the average percentage of customer survey responses based on an additional metric within the survey. This number is calculated by taking the sum of all values, then dividing them by the total number of interactions, where surveys exist (i.e., the [Save Survey Results](#) block was used).

Customer Satisfaction (CSAT)

Wallboard name: Customer Satisfaction

Metrics categories: Agent, Service, Team

Customer Satisfaction is the average result of surveys where the customer satisfaction question has been answered.

Estimated Campaign Duration (Est Duration)

Wallboard name: Estimated campaign duration

Metrics categories: Campaign, Service

Estimated Campaign Duration is the estimated length of time a campaign will run today with enough records to keep all logged-in agents busy.

Estimated Wait Time (IN EWT)

Wallboard name: Estimated wait time

Metrics categories: Campaign, Service

Estimated Wait Time is the estimated time a client will wait before being serviced. This metric includes callback requests. When this metric is displayed as a total for several services, it shows the value for the service where the wait time is currently the longest.

First Call Resolution (FCR)

Wallboard name: First Call Resolution

Metrics categories: Agent, Service, Team

First Call Resolution is the percentage of calls resolved by agents during a customer's first call. This number is calculated by dividing the sum of interactions marked as First Call Resolution by all interactions where save survey exists (i.e., the [Save Survey Results](#) block was used).

Inbound Calls Abandoned for the Day (IN Total Abandoned)

Wallboard name: Inbound abandoned

Metrics categories: Campaign, Service

Inbound Calls Abandoned for the Day is the number of inbound interactions terminated by the originating party.

Inbound Calls Abandoned in IVR for the Day (IN IVR Abandoned)

Wallboard name: Inbound abandoned in IVR

Metrics categories: Campaign, Service

Inbound Calls Abandoned in IVR for the Day is the number of inbound interactions terminated while being serviced by an [IVR](#) application.

Inbound Calls Abandoned in Queue for the Day (IN Queue Abandoned)

Wallboard name: Inbound abandoned in queue

Metrics categories: Campaign, Service

Inbound Calls Abandoned in Queue for the Day is the number of inbound interactions terminated by the originating party while waiting in queue.

Inbound Calls Abandoned While Ringing for the Day (IN Ringing Abandoned)

Wallboard name: Inbound abandoned while ringing

Metrics categories: Campaign, Service

Inbound Calls Abandoned While Ringing for the Day is the number of inbound calls terminated by the originating party while the line is ringing.

Inbound Calls Currently in IVR (IN in IVR)

Wallboard name: Inbound in IVR now

Metrics categories: Campaign, Service

Inbound Calls Currently in IVR is the number of inbound calls currently being processed by an [IVR](#) application.

Inbound Calls Currently Ringing (IN Ringing)

Wallboard name: Inbound ringing on agents now

Metrics categories: Campaign, Service

Inbound Calls Currently Ringing is the number of inbound calls currently ringing for agents.

Inbound Calls Dropped by System in IVR for the Day (IN IVR Dropped)

Wallboard name: Inbound dropped by system in IVR

Metrics categories: Campaign, Service

Inbound Calls Dropped by System in IVR for the Day is the number of inbound calls that have been disconnected by the system while being processed by an [IVR](#) application.

Inbound Calls Dropped by System in Queue for the Day (IN Queue Dropped)

Wallboard name: Inbound dropped by system in queue

Metrics categories: Campaign, Service

Inbound Calls Dropped by System in Queue for the Day is the number of inbound calls that have been disconnected by the system while waiting in queue.

Inbound Calls Dropped by System While Ringing for the Day (IN Ringing Dropped)

Wallboard name: Inbound dropped by system while ringing

Metrics categories: Campaign, Service

Inbound Calls Dropped by System While Ringing for the Day is the number of inbound calls that have been disconnected by the system while ringing.

Inbound Calls Duration Average for the Day (IN Avg Talk Time)

Wallboard name: Inbound duration average

Metrics categories: Agent, Campaign, Service

Inbound Calls Duration Average for the Day is the average of talk time of [IN Handled](#) calls. When displayed as a total for several services, this metric shows the average across all services in the set (i.e., it is calculated as the total sum of all durations across all services divided by the total sum of all interactions across all services).

Inbound Calls Duration Total for the Day (IN Total Talk Time)

Wallboard name: Inbound duration total

Metrics categories: Agent, Campaign, Service

Inbound Calls Duration Total for the Day is the sum of talk time of [IN Handled](#) calls.

Inbound Calls First Time Queued for the Day (IN Queued Unique)

Wallboard name: Inbound queued unique

Metrics category: Campaign

Inbound Calls First Time Queued for the Day is the number of inbound calls that entered queued state for the first time. This includes both inbound calls and callbacks dialed and answered by the customer.

Inbound Calls in IVR, Queue or on Agents Now (IN Calls in Progress)

Wallboard name: Inbound in IVR, queue or on agents now

Metrics categories: Campaign, Service

Inbound in IVR, Queue or on Agents Now is the number of in-progress, inbound calls that are in either IVR, service queue, or being handled by agents.

Inbound Calls Queued for the Day (IN Queued)

Wallboard name: Inbound queued

Metrics categories: Campaign, Service

Inbound Calls Queued for the Day is the number of inbound calls that enter a queued state for the day. This includes both inbound calls and callbacks dialed and answered by the customer.

Inbound Calls Rejected or Unanswered by Agents for the Day (IN Rejected)

Wallboard name: Inbound rejected or missed by agents

Metrics categories: Agent, Campaign, Service

Inbound Calls Rejected or Unanswered by Agents for the Day is the number of times agent state was moved by the system to not the [Not Ready](#) state. This includes both inbound calls and callbacks dialed and answered by the customer.

Inbound Calls Released by Agents for the Day (IN Agent Disconnected)

Wallboard name: Inbound released by agents

Metrics categories: Agent, Campaign, Service

Inbound Calls Released by Agents for the Day is the number of inbound calls disconnected by agents while talking to callers for the day. This includes both inbound calls and callbacks dialed and answered by the customer.

Inbound Calls Released by Callers for the Day (IN Remote Disconnected)

Wallboard name: Inbound released by callers

Metrics categories: Campaign, Service

Inbound Calls Released by Callers for the Day is the number of inbound calls ended by callers.

Inbound Calls Routed to Agents for the Day (IN Routed)

Wallboard name: Inbound routed to agents

Metrics categories: Campaign, Service

Inbound Calls Routed to Agents for the Day is the number of inbound calls that were queued and then routed to agents for the day.

Inbound Calls Self Serviced for the Day (IN Self Serviced)

Wallboard name: Inbound self serviced

Metrics categories: Campaign, Service

Inbound Calls Self Serviced for the Day is the number of inbound calls disconnected by the caller in [IVR](#) state with self-service flag set. This includes both inbound calls and callbacks dialed and answered by the customer.

Inbound Calls Short Abandoned in Queue for the Day (IN Queue Sh-Abandoned)

Wallboard name: Inbound short-abandoned in queue

Metrics categories: Campaign, Service

Inbound Calls Short Abandoned in Queue for the Day is the number of inbound interactions that have been terminated by the originating party while waiting in the service queue before the configured [Service Level threshold](#).

Inbound Emails Carried Over from Previous Day (IN Carried Over)

Wallboard name: Inbound emails carried over

Metrics categories: Agent, Campaign, Service

Inbound Emails Carried Over from Previous Day is the number of inbound emails that arrived at this service at any time before the reset time and remained unprocessed at the reset time. This metric includes both new emails and emails related to existing threads.

Inbound Emails Carried Over from Previous Day for New Cases (IN Carried Over New)

Wallboard name: Inbound emails carried over from previous day

Metrics categories: Agent, Campaign, Service

Inbound Emails Carried Over from Previous Day for New Cases is the number of inbound emails that arrived at this service the day before the reset time and remained unprocessed at the reset time. This metric includes both new emails and emails related to existing threads.

Inbound Emails Closed Without Reply for the Day (IN Closed)

Wallboard name: Inbound emails dispositioned without reply

Metrics categories: Agent, Campaign, Service

Inbound Emails Closed Without Reply for the Day is the number of inbound emails that have had been assigned a disposition but have not been replied to.

Inbound Emails Currently on Agents, Saved in Personal Queues (IN Desktop)

Wallboard name: Inbound emails in personal queues now

Metrics categories: Agent, Campaign, Service

Inbound Emails Currently on Agents, Saved in Personal Queues is the current number of inbound emails that have been pulled into an agent's personal queue. Note that this metric is not a number of cases, except in the specific situation when each case originates from an inbound email and contains only one inbound email. For more information about the difference between cases and emails, see the *Agent Guide*, section [Cases, Email, and Threads](#).

Inbound Emails Currently on Agents, Saved in Personal Queues, Waiting in Excess of SLA Time (IN Breached SLA)

Metrics categories: Agent, Campaign, Service

Inbound Emails Currently on Agents, Saved in Personal Queues, Waiting in Excess of SLA Time is processed emails that remained in agent personal queues that were not replied within the [service level agreement \(SLA\)](#) time.

Inbound Emails Offered to Agent for the Day (IN Offered)

Metrics categories: Agent, Campaign

Inbound Emails Offered to Agent for the Day is the total number of emails that were pushed to the agent in the given reporting interval. This metric does not include pulled or manually assigned emails.

Inbound Emails Pulled by Agent for the Day (IN Pulled)

Wallboard name: Inbound emails pulled by agent

Metrics categories: Agent, Campaign

Inbound Emails Pulled by Agent for the Day is the total number of emails that were pulled by the agent from the service queues in the given reporting interval. Approval queues are excluded.

Inbound Emails Replied for the Day (IN Replied)

Wallboard name: Inbound emails replied

Metrics categories: Agent, Campaign, Service

Inbound Emails Replied for the Day is the number of inbound emails that agents have replied to.

Note: If ACW is set for an email service, then this metric is changed only after an agent leaves the ACW state.

Inbound Emails Unanswered for the Day (IN Ignored)

Wallboard name: Inbound emails not accepted

Metrics categories: Agent, Campaign, Service

Inbound emails not accepted is the number of emails that were pushed to the agent and not accepted (returned back to queue or transferring agent). It does not include emails that went into receiving agent personal queue

Inbound Interactions Being Put on Hold by Agent(s) for the Day (IN on Hold)

Wallboard name: Inbound held

Metrics categories: Agent, Campaign

Inbound Interactions Being Put on Hold by Agent(s) for the Day is the number of inbound service calls put on hold by a user during her login session. The counter is reset when the user logs out.

Inbound Interactions Currently in IVR, Queue or on Agents (IN in Progress)

Metrics categories: Campaign, Service

Inbound Interactions Currently in IVR, Queue or on Agents counts the number of interactions currently in [IVR](#) with a particular Service as well as the number of interactions ringing or connected to agents for the service. It does not count the interactions in [wrap-up](#) state.

Note: If ACW is set for an email service, then this metric is changed only after an agent leaves the ACW state.

Inbound Interactions Currently in Queue (IN Waiting)

Dashboard name: Q

Wallboard name: Inbound in queue now

Metrics categories: Campaign, Skill, Service

Inbound Interactions Currently in Queue is the number of inbound calls currently in queued state. This includes both inbound calls and callbacks dialed and answered by the customer.

Inbound Interactions Currently Handled by Agents (IN Active)

Wallboard name: Inbound handled by agents now

Metrics categories: Agent

Inbound Interactions Currently Handled by Agents provides the number of inbound interactions currently being actively handled by agents. This metric includes all inbound interactions in the agents' active communications list (ACL), except the ones in the ACW phase. Note that emails in agents' *My Queues* are not considered active and are not included in this count.

Note that in earlier versions of Bright Pattern Contact Center, the voice-only equivalent of this metric was called *IN Talking*.

Inbound Interactions Handled by Agents for the Day (IN Handled)

Dashboard name: CH

Wallboard name: Inbound handled by agents

Metrics categories: Agent, Campaign, Service

Inbound Interactions Handled by Agents for the Day is the number of inbound interactions that have been handled by agents since the beginning of the day interval; it includes successful [virtual queue callbacks](#). This metric will count all instances of possible transfers and conferences as separate interactions. For emails, this metric includes [IN Replied](#), [IN Closed](#), [IN Transferred](#), and [IN Svc Changed](#).

Note: If ACW is set for an email service, then this metric is changed only after an agent leaves the ACW state.

Inbound Interactions Received for the Day (IN Received)

Wallboard name: Inbound received

Metrics categories: Campaign, Service

Inbound Interactions Received for the Day is the number of inbound interactions that have requested this service since reset time. For emails, this metric includes both new emails and emails related to existing threads. Interactions received via transfer or service change are not included.

Inbound Interactions Received for the Day for New Cases (IN Received New)

Wallboard name: Inbound emails that created new cases

Metrics categories: Campaign, Service

Inbound Interactions Received for the Day for New Cases is the number of inbound emails which create new cases for the day. This metric excludes emails related to existing email threads.

Inbound Interactions Transferred by Agents for the Day (IN Transferred)

Dashboard name: CT

Wallboard name: Inbound transferred away

Metrics categories: Agent, Campaign, Service

Inbound Interactions Transferred by Agents for the Day is the number of inbound interactions that have been transferred to an external service.

Inbound Service Level Target

Wallboard name: Inbound Service Level target

Metrics categories: Campaign, Service

Inbound Service Level Target the target percentage of inbound interactions being serviced; this number is configured by system administrators.

Inbound Service Level Threshold

Wallboard name: Inbound Service Level threshold

Metrics categories: Campaign, Service

Inbound Service Level Threshold is the amount of time allotted to inbound service interactions.

Inbound Transfers Received for the Day (IN Transfers)

Wallboard name: Inbound received as transfers

Metrics categories: Agent, Campaign, Service

Inbound Transfers Received for the Day is the number of inbound call transfers.

Logged-in Agents (Logged In)

Wallboard name: Matching agents logged-in

Metrics categories: Campaign, Skill, Service, Team

Logged-in Agents is the number of agents currently logged into Agent Desktop in any [state](#) except Supervising. When displayed as a total for several services, this metric shows the total number of distinct agents with the given service skill(s) in this state. Agents with skills corresponding to multiple services in the set are counted once.

Max Inbound Wait Time (IN Max Wait)

Dashboard name: WT

Wallboard name: Inbound longest wait now

Metrics categories: Campaign, Skill, Service

Max Inbound Wait Time provides the current wait time of the inbound interaction that has been waiting in queue the longest and is still unanswered; this includes inbound calls, callbacks dialed and answered by customers, inbound chats, and inbound emails. Note that an interaction could wait in queue several times (i.e., it could be requeued for another service either automatically or manually). In this case, the metric shows the interaction for the service it is currently waiting for but calculates the total waiting time since the moment the interaction entered the first service queue. When this metric is displayed as a total for several services, it shows the value for the service where the wait time is currently the longest.

For inbound email interactions, note the following: This metric is the current wait time of the email that has been waiting in the queue the longest time (and is still waiting), compared to all other emails currently waiting in the same queue. This includes service closure hours and is available for both Push and Pull distribution modes. Note that for email services this metric is updated once per hour.

Most Frequent Dispositions (Top Dispositions)

Metrics category: Agent

Most Frequent Dispositions is the 10 most frequent dispositions set by an agent.

My ACW Time (ACW Time)

Metrics category: Agent

My ACW Time is the total number of seconds an agent was in [ACW](#) state. This metric is counted per agent per day.

My Break Time (BT)

Wallboard name: Break time total

Metrics category: Agent

My Break Time counts the total time the agent spends in Not Ready states with reasons marked as "counts toward break time".

My Busy Time (Busy Time)

Metrics category: Agent

My Busy Time is the total number of seconds an agent was in the [Busy](#) state. This metric is counted per agent, per day.

My Ready Time (Ready Time)

Metrics category: Agent

My Ready Time is the total number of seconds an agent was in the [Ready](#) state. This metric is counted per agent, per day.

My Success Rate (SR)

Dashboard name: SR

Wallboard name: Success rate

Metrics category: Agent, Campaign

My Success Rate is the percentage of calls handled per agent that received the Success disposition type divided by the total number of calls with this service. This metric is calculated for all services the agent handles.

My Team Success Rate (TR)

Dashboard name: TR

Wallboard name: Success rate

Metrics category: Campaign, Team

My Team Success Rate is the percentage of calls handled per team that received the Success disposition type divided by the total number of calls with this service. This metric is calculated with break-downs per service and per team.

Net Promoter Score (NPS)

Wallboard name: Net Promoter Score

Metrics categories: Agent, Service, Team

Net Promoter Score (NPS) is the percentage of points for all surveys where a response was given for the contact satisfaction question. The percentage is calculated out of the number of interactions, where surveys exist (i.e., the [Save Survey Results](#) block was used). The percentage is calculated by subtracting the percentage of promoters (values 9 and 10) by the percentage of detractors (values 0-6). For more information about NPS, see netpromoter.com/know.

Not Ready Agents (Not Ready)

Wallboard name: Matching agents not ready

Metrics categories: Campaign, Service, Team

Not Ready Agents is the number of agents in [Not Ready](#) state. When displayed as a total for several services, this metric shows the total number of distinct agents with the given service skill(s) in this state. Agents with skills corresponding to multiple services in the set are counted once.

Number of Inbound Emails Joined to Already Existing Case, Per Day (IN Joined)

Wallboard name: Inbound emails for existing queued cases

Metrics categories: Agent, Campaign, Service

Number of Inbound Emails Joined to Already Existing Case, Per Day is the total number of inbound emails for this service that have been joined to already existing cases.

Number of Interactions on Agent (Active)

Metric Categories: Agent, Campaign

Number of Interactions on Agent provides the number of interactions that are currently being actively handled by the agent (i.e., inbound and outbound). This metric includes all interactions in the agents' [Active Communications List \(ACL\)](#), including the ones in the [ACW](#) stage. Emails in agents' *My Queues* are not considered active and are not included in this count. If an agent has more than one active interaction, clicking on the value of this metric will "unfold" the agent's row into a list showing information about all interactions that are currently being handled by this agent. Note that in earlier versions of Bright Pattern Contact Center, the related metrics used to be called # *Calls* and # *Chats*, and email *My Queue* used to be called *Personal Queue*.

Number of Interactions Re-categorized from a Different Service by Agents (IN Svc Change Received)

Wallboard name: Number of interactions recategorized from a different service

Metrics categories: Campaign, Service

Number of Interactions Re-categorized from a Different Service by Agents counts the number of times agents have changed received interaction services from one service to another service.

Number of Interactions Recategorized to a Different Service by Agents (IN Svc Changed)

Wallboard name: Number of interactions recategorized to a different service

Metrics categories: Agent, Campaign, Service

Number of Interactions Recategorized to a Different Service by Agents counts the number of times agents have changed interaction services to one service from another service.

Number of New Emails Processed by Agents, Including Replied, Closed Without Reply, Transferred and Service Changes (IN Handled New)

Wallboard name: Inbound emails handled

Metrics categories: Agent, Campaign, Service

Number of New Emails Processed by Agents, Including Replied, Closed Without Reply, Transferred and Service Changes is the number of first actions (reply, closed without reply, transfers and service changes) on new cases/threads. This metric counts only on the first action of an agent per email thread.

Note: If ACW is set for an email service, then this metric is changed only after an agent leaves the ACW state.

Number of Records Excluded by DNC Lists from Active Lists (Lists DNC)

Wallboard name: Number of records excluded by DNC lists from active lists

Metrics categories: Campaign, List, Service

Number of Records Excluded by DNC Lists from Active Lists is the total number of records that are excluded from active lists because they also appear on [Do Not Call \(DNC\)](#) lists.

Number of Records in Quota Groups That Reached Quota Limits (Out of Quota)

Wallboard name: Records in quota groups that reached quota limits

Metrics category: Service

Number of Records in Quota Groups That Reached Quota Limits is the number of non-finalized records that belong to quota groups that have reached the quota limits. The purpose of this metric is to provide a view on the number of remaining dialable records from a campaign.

Number of Records With a Success Disposition (Successes)

Metrics categories: List, Service

Number of Records With a Success Disposition is the number of records received with any of the success dispositions.

Occupancy in Campaign/Service (Occupancy)

Wallboard name: Occupancy of matching agents

Metrics categories: Agent, Campaign, Service, Team

Occupancy in Campaign/Service is the percentage of time agents have spent handling interactions of the given service (including the preview time and after-call work) out of their total working time (i.e., the time the agents have spent handling interactions of any service and being [Ready](#) to handle interactions).

Outbound Answered Calls That Did Not Connect to Agent in Compliance Time, Per Day (OUT Unattended)

Wallboard name: Outbound calls answered, out of connection speed compliance

Metrics categories: Campaign, Service

Outbound calls answered, out of connection speed compliance is the number of outbound calls answered that do not meet a minimum connection speed.

Outbound Call Attempts Currently in Progress (OUT in Progress)

Wallboard name: Outbound call attempts in progress now

Metrics categories: Campaign, Service

Outbound Call Attempts Currently in Progress is the number of outbound calls in a dialing or [call progress analysis \(CPA\)](#) state.

Outbound Call Attempts for the Day (OUT Dialed)

Dashboard name: CM

Wallboard name: Outbound call attempts

Metrics categories: Campaign, Service

Outbound Call Attempts for the Day is the total number of outbound calls agents have placed for the day.

Outbound Calls Abandoned at any Stage for the Day (OUT Abandoned)

Wallboard name: Outbound calls abandoned

Metrics categories: Campaign, Service

Outbound Calls Abandoned at any Stage for the Day is the number of outbound calls that have been terminated by agents for the day.

Outbound Calls Abandoned in IVR for the Day (OUT IVR Abandoned)

Wallboard name: Outbound calls abandoned in IVR

Metrics categories: Campaign, Service

Outbound Calls Abandoned in IVR for the Day is the number of outbound calls terminated while being processed by an [IVR](#) application for the day.

Outbound Calls Abandoned in Queue for the Day (OUT Queue Abandoned)

Wallboard name: Outbound calls abandoned in queue

Metrics categories: Campaign, Service

Outbound Calls Abandoned in Queue for the Day the number of outbound calls that have been terminated while waiting in the service queue.

Outbound Calls Abandoned While Ringing for the Day (OUT Ringing Abandoned)

Wallboard name: Outbound calls abandoned while ringing

Metrics categories: Campaign, Service

Outbound Calls Abandoned While Ringing for the Day is the number of outbound calls disconnected by customers while ringing on agents for the day.

Outbound Calls Attempts Failed for the Day (OUT Failed)

Wallboard name: Outbound calls attempts failed

Metrics categories: Campaign, Service

Outbound Calls Attempts Failed for the Day is the number of outbound calls initiated by agents and not answered by customers for a particular service for the day.

Outbound Calls Currently in IVR (OUT in IVR)

Wallboard name: Outbound calls in IVR %

Metrics categories: Campaign, Service

Outbound Calls Currently in IVR is the percentage of all outbound calls being processed by an [IVR](#) application out of all current outbound calls. When displayed as a total for several services, this metric shows the percentage calculated across all services in the set.

Outbound Calls Currently in Queue (OUT Waiting)

Wallboard name: Outbound calls in queue now

Metrics categories: Campaign, Service

Outbound Calls Currently in Queue is the number of outbound calls currently in Queued state.

Outbound Calls Delivered to Agents and Currently Ringing (OUT Ringing)

Wallboard name: Outbound calls ringing on agents now

Metrics categories: Campaign, Service

Outbound Calls Delivered to Agents and Currently Ringing is the number of outbound calls currently in Delivery Pending state (ringing on the agent, waiting for agent answer).

Outbound Calls Dropped in IVR for the Day (OUT IVR Dropped)

Wallboard name: Outbound calls dropped in IVR

Metrics categories: Campaign, Service

Outbound Calls Dropped in IVR for the Day is the number of outbound calls that have been disconnected by the system while being processed by an [IVR](#) application.

Outbound Calls Dropped in Queue for the Day (OUT Queue Dropped)

Wallboard name: Outbound calls dropped in queue

Metrics categories: Campaign, Service

Outbound Calls Dropped in Queue for the Day is the number of outbound calls that have been disconnected by the system while waiting in queue.

Outbound Calls Dropped While Ringing for the Day (OUT Ringing Dropped)

Wallboard name: Outbound calls dropped while ringing

Metrics categories: Campaign, Service

Outbound Calls Dropped While Ringing for the Day is the number of outbound calls that have been disconnected by the system while the line is ringing for agents for the day.

Outbound Calls Duration Average for the Day (OUT Avg Talk Time)

Wallboard name: Outbound calls duration average

Metrics categories: Agent, Campaign, Service

Outbound Calls Duration Average for the Day is the average talk time for [OUT Handled](#) calls. When displayed as a total for several services, this metric shows the average across all services in the set (i.e., it is calculated as the total sum of all durations across all services divided by the total sum of all interactions across all services).

Outbound Calls Duration Total for the Day (OUT Total Talk Time)

Wallboard name: Outbound calls duration total

Metrics categories: Agent, Campaign, Service

Outbound Calls Duration Total for the Day is the sum of talk time of [OUT Handled](#) calls.

Outbound Calls Queued for the Day (OUT Queued)

Wallboard name: Outbound calls queued

Metrics categories: Campaign, Service

Outbound Calls Queued for the Day is the number of outbound calls waiting in the service queue.

Outbound Calls Rejected or Unanswered by Agents for the Day (OUT Rejected)

Wallboard Name: Outbound calls rejected or missed by agents

Metrics categories: Agent, Campaign, Service, Team

Outbound calls rejected or missed by agents is the number of outbound calls that have been either rejected or unanswered by agents.

Outbound Calls Released by Agent for the Day (OUT Agent Disconnected)

Wallboard name: Outbound calls released by agent

Metrics categories: Campaign, Service

Outbound Calls Released by Agent for the Day is the number of outbound calls ended by agents.

Outbound Calls Released by Remote Party for the Day (OUT Remote Disconnected)

Wallboard name: Outbound calls released by remote party

Metrics categories: Campaign, Service

Outbound Calls Released by Remote Party for the Day is the number of outbound calls ended by the customer.

Outbound Calls Routed to Agents for the Day (OUT Routed)

Dashboard name: CRA

Wallboard name: Outbound calls routed to agents

Metrics categories: Campaign, Service

Outbound Calls Routed to Agents for the Day is the number of outbound calls that were queued and then routed to agents for the day. If a call is routed to an agent more than once with the same service, it is counted multiple times.

Outbound Calls Self Serviced for the Day (OUT Self Serviced)

Wallboard name: Outbound calls self serviced

Metrics categories: Campaign, Service

Outbound Calls Self Serviced for the Day is the number of outbound calls that have been terminated with a [Self-Service](#) indicator while being processed by an [IVR](#) application.

Outbound Calls Transferred by Agents for the Day (OUT Xfers or OUT Transferred)

Wallboard name: Outbound calls transferred away

Metrics categories: Campaign, Service

Outbound Calls Transferred by Agents for the Day is the number of outbound calls where agents initiate transfers for the day (either to queue, another agent or external number).

Outbound Current Calling Rate (OUT Call Rate)

Dashboard name: CR

Wallboard name: Outbound calling rate now

Metrics categories: Campaign, Service

Outbound Current Calling Rate is the current number of outbound calls being attempted by agents per minute.

Outbound Emails Currently on Agents, Saved in Personal Queues (OUT Desktop)

Wallboard name: Outbound emails in personal queue

Metrics categories: Agent, Campaign

Outbound Emails Currently on Agents, Saved in Personal Queues is the number of saved drafts of outbound emails that remained in agent personal queues.

Outbound Interactions Currently Handled by Agents (OUT Active)

Wallboard name: Outbound interactions handled by agents now

Metrics categories: Campaign, Service

Outbound Interactions Currently Handled by Agents is the number of outbound interactions currently being handled and completed by agents.

Outbound Interactions Handled by Agents for the Day/ Number of Unsolicited Emails and Follow-up Responses (OUT Handled)

Dashboard name: OCH

Wallboard name: Outbound interactions handled by agents (email - send non-replies)

Metrics categories: Agent, Campaign, Service, Team

Outbound Interactions Handled by Agents for the Day/ Number of Unsolicited Emails and Follow-up Responses is the number of outbound interactions that have been handled by agents; it includes campaign calls. For emails, this includes both new outbound emails and possible follow-up email messages related to existing email threads but does not include emails that have been started and discarded without sending.

Outbound Successful Calls Attempts for the Day (OUT Answered)

Wallboard name: Outbound calls attempts successful

Metrics categories: Campaign, Service

Outbound Successful Calls Attempts for the Day is the number of successful outbound call attempted by agents.

Percentage of Calls That Did Not Connect to Agent in Compliance Time, Per Day (OUT Unattended %)

Wallboard name: Outbound calls answered, out of connection speed compliance %

Metrics categories: Campaign, Service

Percentage of Calls That Did Not Connect to Agent in Compliance Time, Per Day is the percentage of all outbound calls answered that do not meet a minimum connection speed. This number is calculated by dividing the total number of unattended calls per day by the total number of outbound calls queued per day. When displayed as a total for several services, this metric shows the percentage calculated across all services in the set.

Percentage of Inbound Calls Abandoned for the Day (IN Total Abandoned %)

Wallboard name: Inbound abandoned %

Metrics categories: Campaign, Service

Percentage of Inbound Calls Abandoned for the Day is the percentage of inbound interactions terminated by the originating party out of all calls received for the day. This number is calculated by dividing the total number of inbound abandoned calls per day by the total number of calls received per day. When displayed as a total for several services, this metric shows the percentage calculated across all services in the set.

Percentage of Inbound Calls Abandoned in Queue for the Day (IN Queue Abandoned %)

Wallboard name: Inbound abandoned in queue %

Metrics categories: Campaign, Service

Percentage of Inbound Calls Abandoned in Queue for the Day is the percentage of inbound interactions terminated by the originating party while waiting in queue out of all inbound calls received for the day. When displayed as a total for several services, this metric shows the percentage calculated across all services in the set.

Percentage of Inbound Calls Handled for the Day (IN Handled %)

Wallboard name: Inbound handled by agents %

Metrics categories: Campaign, Service

Percentage of Inbound Calls Handled for the Day is the percentage of all inbound interactions that have been handled and completed by agents out of all inbound calls received for the day. When displayed as a total for several services, this metric shows the percentage calculated across all services in the set.

Percentage of Inbound Calls Short Abandoned in Queue for the Day (IN Queue Short Abandoned %)

Wallboard name: Inbound short-abandoned in queue %

Metrics categories: Campaign, Service

Percentage of Inbound Calls Short Abandoned in Queue for the Day is the percentage of inbound interactions that have been terminated by the originating party while waiting in the service queue before the configured [Service Level threshold](#). This number is calculated by dividing the total number of inbound calls short-abandoned in queue per day by the total number of inbound calls queued per day. When displayed as a total for several services, this metric shows the percentage calculated across all services in the set.

Percentage of Inbound Interactions Answered in Service Level Over 20 Most Recent Calls (IN Svc Level % or SLA)

Dashboard name: SLA

Wallboard name: Inbound interactions answered in Service Level % (moving window)

Metrics categories: Campaign, Service

Inbound interactions answered in Service Level % (moving window) is the percentage of interactions answered before the threshold time (20 seconds by default) relative to all answered and abandoned interactions (except short abandoned) calculated over the 20 most recent calls. For email interactions, it is the percent of emails replied to within the predefined [Service Level threshold](#), relative to all replied emails. When this metric is displayed as a total for several services, it shows the value for the service where the service level is currently the lowest.

Percentage of Inbound Interactions Answered in Service Level Over the Day (IN Svc Level Day %)

Wallboard name: Inbound interactions answered in Service Level %

Metrics categories: Campaign, Service

Percentage of Inbound Interactions Answered in Service Level Over the Day is the percentage of calls answered before the threshold time (20 seconds by default) relative to all answered and abandoned interactions (except short abandoned) calculated for the day. For email interactions, it is the percentage of emails replied to within the predefined [Service Level threshold](#), relative to all replied emails. When this metric is displayed as a total for several services, it shows the value for the service where the service level is currently the lowest.

Percentage of Outbound Calls Abandoned at any Stage for the Day (OUT Abandoned %)

Wallboard name: Outbound calls abandoned %

Metrics categories: Campaign, Service

Percentage of Outbound Calls Abandoned at any Stage for the Day is the percentage of calls that were dropped by customers in [IVR](#) or in Queue (including short and long waits) before being answered by agents out of all calls entered in IVR for the day. When displayed as a total for several services, this metric shows the percentage calculated across all services in the set.

Percentage of Outbound Calls Abandoned in IVR for the Day (OUT IVR Abandoned %)

Wallboard name: Outbound calls abandoned in IVR %

Metrics categories: Campaign, Service

Percentage of Outbound Calls Abandoned in IVR for the Day is the percentage of calls that were dropped by customers in the [IVR](#) scenario out of all calls entered in IVR for the day. When displayed as a total for several services, this metric shows the percentage calculated across all services in the set.

Percentage of Outbound Calls Abandoned in Queue for the Day (OUT Queue Abandoned %)

Wallboard name: Outbound calls abandoned in queue %

Metrics categories: Campaign, Service

Percentage of Outbound Calls Abandoned in Queue for the Day is the percentage of calls that were dropped by customers while waiting in queue for an agent out of all calls entered in queue for the day. When displayed as a total for several services, this metric shows the percentage calculated across all services in the set.

Percentage of Outbound Successful Call Attempts for the Day (OUT Answered %)

Wallboard name: Outbound calls attempts successful %

Metrics categories: Campaign, Service

Percentage of Outbound Successful Call Attempts for the Day is the percentage of successful outbound calls attempted by agents out of all calls attempted for the day. When displayed as a total for several services, this metric shows the percentage calculated across all services in the set.

Percentage of Records Attempted for the Day (Attempted %)

Wallboard name: Records attempts %

Metrics categories: Campaign, List, Service

Percentage of Records Attempted for the Day is the percentage of records attempts during a campaign out of all records for the day. When displayed as a total for several services, this metric shows the percentage calculated across all services in the set.

Percentage of Records Completed for the Day (Completed %)

Wallboard name: Records completions %

Metrics categories: Campaign, List, Service

Percentage of Records Completed for the Day is the percentage of completed records from a campaign for the day out of the sum of completed and remaining records for the day. When displayed as a total for several services, this metric shows the percentage calculated across all services in the set.

Percentage of Records Completed in Active Lists (Active Lists Completed %)

Wallboard name: Records completed in active lists %

Metrics categories: Campaign, List, Service

Percentage of Records Completed in Active Lists is the percentage of records completed per campaign out of the sum of completed and remaining records for the currently enabled lists. When displayed as a total for several services, this metric shows the percentage calculated across all services in the set.

Percentage of Records Skipped for the Day (Skipped %)

Wallboard name: Records skips %

Metrics categories: Agent, Campaign, Service

Percentage of Records Skipped for the Day is the percentage of records skipped per agent, per day, out of the total number of records the agent previewed. When displayed as a total for several services, this metric shows the percentage calculated across all services in the set.

Quota of Successes for the Calling List Quota Group (Quota)

Metrics categories: List

Quota of Successes for the Calling List Quota Group is the number of records that must receive a success disposition in this quota group. For disposition-based groups, it counts only the specific disposition of the group. For source field-based groups, it counts any success disposition.

Records Attempted for the Day (Attempted)

Wallboard name: Records attempts

Metrics categories: Campaign, List, Service

Records Attempted for the Day is the number of records from a campaign where contact has been attempted, including the records that are currently being attempted.

Records Completed for the Day (Completed)

Wallboard name: Records completions

Metrics categories: Campaign, List, Service

Records Completed for the Day is the number of records from a campaign that have been completed (i.e., the records for which final dispositions have been set).

Records Dialable Right Now (Dialable)

Metrics categories: Campaign, List, Service

Records Dialable Right Now displays the number of records in the list/campaign of non-closed records that can be called right now (taking into account calling hours and reschedule limitations). Please note, if the number of dialable records is more than 1000, the statistic will show "1000+". If the number of records is less than 1000, the statistic will show the actual number.

Records Expired (Expired)

Metrics categories: Campaign, List, Service

Records Expired displays the number of records in the list that have expired since they have been exported. The expiration is defined in calling list configuration.

Records Previewed for the Day (Previewed)

Wallboard name: Records previews

Metrics categories: Agent, Campaign, Service

Records Previewed for the Day is the number of preview interactions from a campaign for the day that agents have accepted (including auto-accepted ones).

Records Skipped for the Day (Skipped)

Wallboard name: Records skips

Metrics categories: Agent, Campaign, Service

Records Skipped for the Day is the number of records agents have accepted from a campaign but then skipped (canceled) per day.

Records State Chart (State Chart)

Metrics categories: Campaign, List, Service

Records State Chart returns 4 arrays of numbers: completed, rescheduled, remaining, and auto-completed. All arrays are indexed by attempt number. The attempt number is a record attempt number (retries are not counted).

- The first array (completed) contains the percentage (0-100) of records completed at this attempt number by agents. The percentage is counted by dividing by the List Records metric.
- The second array (rescheduled) contains the percentage of records rescheduled from this attempt number to the next attempt number; the percentage is calculated out of all list records.
- The third array (remaining) contains the percentage of records remaining not attempted on this attempt out of all list records.
- The fourth array (auto-completed) contains the percentage (0-100) of records completed at this attempt number by dialer (either by hitting a [DNC](#) record or reaching max attempts). The percentage is counted by dividing by the List Records metric.

Remaining Records in Active Lists (Lists Remaining or RR)

Dashboard name: RR

Wallboard name: Remaining records in active lists

Metrics categories: Campaign, List, Service

Remaining Records in Active Lists is the approximate number of remaining records from a campaign (not including records from disabled lists).

Remaining Records With Personal Agent Assignments (Lists P.A. Remaining)

Wallboard name: Remaining records with personal agent assignments

Metrics categories: Agent, Campaign, List, Service

Remaining Records With Personal Agent Assignments is the approximate number of remaining records from a campaign that have assigned personal agents (not including records from disabled lists).

Selected Dispositions Percentage

Wallboard name: Selected dispositions percentage

Metrics categories: Service

Selected Dispositions Positions displays the total percentage of dispositions that have been selected from all inbound calls out of all dispositioned calls; the metric is displayed per service per day.

Time in Preview (Preview Duration)

Wallboard name: Preview duration now

Metrics categories: Agent, Campaign

Time in Preview is the number of seconds the agent is spending in the [Busy](#) state with preview interaction. The metric returns a value of 0 if the agent is not doing a preview interaction at the moment.

Total Number of Records in Active Lists (Lists Records)

Wallboard name: Count of records in all active lists

Metrics categories: Campaign, Lists, Service

Total Number of Records in Active Lists is the number of all records, completed and remaining, in all currently enabled lists.

Unique Inbound Calls Handled by Agents for the Day (IN Handled Unique)

Wallboard name: Inbound handled unique

Metrics categories: Agent, Campaign, Service

Unique Inbound Calls Handled by Agents for the Day is the number of inbound service calls handled by all agents since the beginning of the day interval. If the same customer call is handled by multiple agents (blind transfer or conference), this metric is increased only on the first answer by the first agent. This includes both inbound calls and callbacks dialed and answered by the customer.

Unique Inbound Interactions Being Put on Hold by Agent(s) for the Day (IN on Hold Unique)

Wallboard name: Inbound held, non-transferred

Metrics categories: Agent, Campaign

Unique Inbound Interactions Being Put on Hold by Agent(s) for the Day is the number of unique inbound service calls put on hold by a user during his login session. The counter is reset when the user logs out.
